Impossible to play. FPS drops after 1 minute playing.. Good game overall.. Maybe Momodora isn't on your radar, but it should be. It's one of the best metroidvanias (silly word) out there. So, as the title says, this is the third installment, but one and two are nowhere to be found on Steam. They can, however, be found itch.io for free (with an optional donation). I'd personally recommend playing them all since they're great games. The first is a bit more linear, not really metroidvania in that there's no map or backtracking, still a very good game. The second improves upon the first in most areas (from what I can recall). So what

---

about the third? Well, it's a bit of a mixed bag, to be honest. while some things are better, I feel rdein (the creator) didn't go all the way for whatever reasons. Still, this is a good game with all the trademarks of a Momodora title; beautiful pixel graphics, great animation, an awesome soundtrack, melancholy story and so, damn, hard. It might not be for everyone, but at this price, it's hard to go wrong. It's a bit light in the story department and that seems to be the downfall of every title. Shame, since they've created such a great world with so much room for lore. What could be a massively expansive experience falls short. And continuity isn't even on the table. It's not a perfect game, but it's a good game. Well worth your money.. Impossible to play. FPS drops after 1 minute playing.. way worse than the sequel, but fun. Maybe Momodora isn't on your radar, but it should be. It's one of the best metroidvanias (silly word) out there. So, as the title says, this is the third installment, but one and two are nowhere to be found on Steam. They can, however, be found itch.io for free (with an optional donation).
